

Santiago Villabona

FULL STACK JUNIOR DEVELOPER (BACKEND + FRONTEND)

Bucaramanga, Colombia

📞 My WhatsApp | ✉️ My email | 🏠 My Portfolio | 🐙 My GitHub | 🔗 My LinkedIn

Professional Profile

Junior Full Stack Developer with professional experience building enterprise applications (.NET, Blazor, microservices architecture on Azure) and a solid full-stack foundation forged through real projects with TypeScript, NestJS, Next.js and React. My background in Systems Engineering and my curiosity drive me to perform well not only in code, but in any technology-related area: data, AI, digital platforms and documentation.

Work Experience

Control Online International S.A.S.

Bucaramanga, Colombia · Hybrid

JUNIOR FULL STACK DEVELOPER — .NET | BLAZOR

May 2026 – Present

- Developed and supported enterprise web applications for document management, implementing new features and resolving production incidents.
- Full stack performance (frontend and backend) with .NET and Blazor, within a microservices architecture deployed on Azure/AKS.
- Designed reusable components and integrated with APIs and external services, with a focus on performance optimization.
- Applied development best practices ensuring scalable, maintainable solutions aligned with corporate standards.

Skills

Programming Languages	TypeScript, JavaScript, Python, C#, SQL.
Backend	NestJS, .NET, JWT, Swagger
Frontend	Next.js, React, Blazor, Astro
Databases	PostgreSQL, SQL Server, MongoDB, Firebase, Prisma
Cloud, DevOps & Quality	Azure, Docker, Git (GitHub), Scrum, Unit testing, auditing.
AI-Assisted Development	Claude Code, OpenCode, SDD, Agentic Coding Workflows
Spoken Languages	Spanish: Native · English: Intermediate (B2).

Relevant Projects

meperPOS | Thesis: Inventory Management and Point of Sale System

Pontifical Bolivarian University

SOFTWARE DEVELOPER

Nov 2025 – Mar 2026

- Contributed to full-stack development with Next.js and NestJS, integrating frontend and backend across inventory and sales flows.
- Implemented and documented features in a backend with 62 REST endpoints, JWT authentication, role-based access control, global rate limiting, and operation auditing.
- Worked on business features such as barcode/SKU management, PDF receipt generation, data import/export, and operational reports.

PDF Maker | Project: Web to PDF Converter

Pontifical Bolivarian University

SOFTWARE DEVELOPER

Jul 2025 – Nov 2025

- Contributed to the development of a web-to-PDF converter based on Java and SOAP services.
- Implemented integrations between the web layer and backend services to ensure end-to-end traceability.
- Project technologies: Java, SOAP, Docker, JavaScript, HTML/CSS.

The Nexus Battles II | Project: Multiplayer Web Game

Pontifical Bolivarian University

SOFTWARE DEVELOPER

Jan 2024 – May 2024

- Developed the wishlist and card auction modules for a multiplayer web game.
- Implemented REST endpoints and SQL/NoSQL queries to ensure data integrity and efficient data access.
- Project technologies: JavaScript, Node.js, Express, Docker, MariaDB, MongoDB.

MicroTech Solutions | Project: Inventory Management Application

Pontifical Bolivarian University

SOFTWARE DEVELOPER

Jul 2024 – Nov 2024

- Implemented modules for barcode scanning, shopping cart, and product/category management.
- Connected frontend and backend for create, update, and delete operations.
- Project technologies: Flutter, Dart, Docker, Firebase, MariaDB, REST APIs.

Education

Systems and Informatics Engineering

Colombia - Bucaramanga Campus

PONTIFICAL BOLIVARIAN UNIVERSITY
